

IN THE CLAIMS

1. (Currently Amended) A method comprising:

creating a program schedule that includes a listing for a television program that has supplementary content provided as an enhancement transmitted in association with the television program;

associating a first predefined unique symbol with a first type of the supplementary content to indicate a one-screen interactivity mode to display first interactive content and the television program on a first screen by a processor;[[,]]
~~or associating a second predefined unique symbol with a second type of the supplementary content~~ to indicate a two-screen interactivity mode to display, on a second screen, second interactive content synchronized to the television program on the first screen, or to indicate a two-screen static web mode to display, on the second screen, static content related but not synchronized to the television program on the first screen by the processor; and
providing the predefined unique symbol in association with the listing in the program schedule.

2. (Canceled)

3. (Canceled)

4. (Currently Amended) The method of claim 1 wherein the first predefined unique symbol is a text string.

5. (Canceled)

6. (Currently Amended) The method of claim 1 wherein the first predefined unique symbol is a graphic symbol.

7. (Currently Amended) The method of claim 1 wherein the first predefined unique symbol is an image.

8. (Original) The method of claim 1 further comprising distributing the program schedule.

9. (Currently Amended) The method of claim 8 further comprising:

printing the program schedule in a publication; and

printing the second predefined unique symbol in the publication.

10. (Currently Amended) The method of claim 8 further comprising:

transmitting the program schedule; and

transmitting the second predefined unique symbol.

11. (Currently Amended) The method of claim 10 further comprising transmitting data which when accessed by a machine causes the machine to display an animated version of the second predefined unique symbol.

12. (Currently Amended) The method of claim 8 further comprising:

making the program schedule available on the World Wide Web; and

providing the second predefined unique symbol in association with the listing in the program schedule on the World Wide Web.

13. (Canceled)

14. (Currently Amended) A method comprising:

receiving a program schedule, the program schedule further comprising:

a first listing for a television program that has supplementary content provided as an enhancement transmitted in association with the television program; and

a second listing for a television program that has supplementary content provided as an enhancement transmitted in association with the television program;

a first predefined unique symbol in association with the first listing, where the first predefined unique symbol is associated with a first type of the supplementary content to indicate a one-screen interactivity mode to display first interactive content and the television program on a first screen, ~~or a second pre-defined unique symbol associated with the second listing where the second pre-defined unique symbol is associated with a second type of the supplementary content~~ to indicate a two-screen interactivity mode to display, on a second screen, second interactive content synchronized to the television program on the first screen, or to indicate a two-screen static web mode to display, on the second screen, static content related but not synchronized to the television program on the first screen; and

sending the program schedule to a display by a processor.

15. (Canceled)

16. (Currently Amended) The method of claim 14 further comprising:

receiving an animated version of the first predefined unique symbol; and

sending the animated version of the predefined first unique symbol to the display.

17. (Currently Amended) A method comprising:

distributing a television program to an audience, where the program has
supplementary content provided as an enhancement transmitted in association
with the television program;

distributing the supplementary content to the audience by a processor, where a first
unique predefined unique symbol is associated with the supplementary content
to indicate a one-screen interactivity mode to display first interactive content
and the television program on a first screen, ~~or~~ and a second pre-defined
unique symbol is associated with the supplementary content to indicate a two-
screen interactivity mode to display, on a second screen, second interactive
content synchronized to the television program on the first screen, or to
indicate a two-screen static web mode to display, on the second screen, static
content related but not synchronized to the television program on the first
screen; and

providing listing information for the television program.

18. (Canceled)

19. (Canceled)

20. (Currently Amended) The method of claim 17 wherein the second predefined unique
symbol is a text string.

21. (Canceled)

22. (Currently Amended) The method of claim 17 wherein the second predefined unique symbol is a graphic symbol.

23. (Currently Amended) The method of claim 17 wherein the second predefined unique symbol is an image.

24. (Currently Amended) An apparatus comprising:

a receiver to receive a transmission comprising a program schedule, the program schedule further comprising:

a first listing for a television program that has supplementary content as provided as an enhancement transmitted in association with the television program; ~~and~~

a second listing for a television program that has supplementary content as provided as an enhancement transmitted in association with the television program

a first predefined unique symbol in association with the first listing, where the predefined unique symbol is associated with a first type of the supplementary content to indicate a one-screen interactivity mode to display first interactive content and the television program on a first screen, ~~or a second pre-defined unique symbol associated with the second listing where the second pre-defined unique symbol is associated with a type of supplementary content~~ to indicate a two-screen interactivity mode to display, on a second screen, second interactive content synchronized to the television program on the first screen, or to indicate a two-screen static web mode to display, on the second screen, static content related but not synchronized to the television program on the first screen; and

a display component coupled to the receiver to display the program schedule on a display device and to display the predefined unique symbol on the display device.

25. (Original) The apparatus of claim 24 further comprising:

an input device to receive a signal corresponding to selection of the predefined unique symbol on the display device by a user; and

a content delivery component to provide the supplementary content in response to the signal.

26. (Currently Amended) A computer-readable storage medium comprising data that when ~~accessed~~executed by a machine causes the machine to perform actions according to the method of claim 14.

27. (Canceled)

28. (Currently Amended) A computer-readable storage medium comprising data that when ~~accessed~~executed by a machine causes the machine to perform actions according to the method of claim 16.
